

# BAEROLUB AID

Polymer Processing Aids (PPA)

## Without PFAS. With full performance.

The EU Regulation PPWR (Packaging & Packaging Waste Regulation) prohibits the use of PFAS in packaging above specified limits from mid 2026. With BAEROLUB AID, we offer you a solution formulated without PFAS that guarantees maximum performance and full legal compliance - sustainable and future-proof.

# The future is PFAS-free – we are ready!

## The benefits of BAEROLUB AID.

Polymer Processing Aids (PPA)

- ✓

**Compliance with global food contact regulations**  
Widest regulatory coverage and expert regulatory affairs support.
- ✓

**Supply chain Know-how**  
From the raw material to finished product.
- ✓

**Global availability**  
Local representation and high quality production standards worldwide.
- ✓

**Fastest time to clear**  
Rapid transition to in-spec production.
- ✓

**Suppresses die lip build up**  
Minimizes deposits and ensures stable production.
- ✓

**Customized solutions**  
Individual formulations according to customer requirements.
- ✓

**Made of sustainable raw materials**  
Designed for sustainability. Formulated with inorganic and non-fossil raw materials.
- ✓

**Convenient handling and storage**  
Masterbatch designed for similar let down rates as used with common PPA concentrates.

# Best quality for over 200 years!

## For performance. For safety. For sustainability.

Our Baerlocher products stand for the highest quality and reliability. World leading polymer producers, with long proven track record in packaging materials, rely on BAEROLUB AID to remove PFAS from their formulations. Thanks to state-of-the-art production technologies and strict controls, we guarantee consistent performance at the highest level.

- ✓ **Certified according to: ISO 9001, ISO 14001, ISO 50001, ecovadis gold medal**
- ✓ **Highest production standards worldwide**
- ✓ **Established and proven in the packaging industry**

## You can rely on tested quality - without compromise!

BÆRLOCHER

# The BAEROLUB AID product family.

## Customized and powerful.

The BAEROLUB AID product family stands for tailor-made, high-performance solutions - developed according to individual customer requirements and formulated without PFAS.

### Our top performer: BAEROLUB AID 2201

It is already successfully implemented in numerous applications and sets the standard for the highest quality, optimum process control and sustainable performance.

### BAEROLUB AID 2201

For rapid melt fracture elimination, minimize deposits in production, broadest applicability.  
(e. g. for blown and cast film producer)

### BAEROLUB AID Customized

For challenging resins and specific applications (e.g. pipe & cable extrusion), for specific needs at processors and polymer producers.

## Product forms

#### Powder

For an exact mixture with other powder raw materials.

#### Pastilles

Dust-free and especially free flowing.

#### Granules

Low-dust and for efficient processing in large quantities.

#### Masterbatch

Ease to dose and ready to use granule, diluted in a carrier resin.

# BAEROLUB AID (EU) PPWR compliant!

The new EU Regulation PPWR (Packaging & Packaging Waste Regulation) requires the elimination of PFAS - we provide the solution. Our innovative non-PFAS product BAEROLUB AID offers the usual performance without compromising on safety and quality. Sustainable, compliant and future-proof: rely on our PFAS-free alternative BAEROLUB AID, which meets the highest standards.

**NO PFAS**

**NO siloxanes and siloxane copolymers**

**NO PEG**

## Free Service Package

With our BAEROLUB Service Package, you receive a customized solution precisely tailored to your requirements – completely free of charge.

#### On-site application support

Our technical expert will visit your production facility, support implementation and discuss any challenges.

#### Customized development

Together with our R&D-department, we will create a perfectly customized solution for your process.
